Flow test request form

Contractor doing flow test: _____

(Business name)

Contact name: _____

Phone: _____ Email: _____

Location of hydrants:(street address/intersection) _____

Number of hydrants to be tested: _____

(limit 3 hydrants)

Purpose: _____

Contractor checklist

- Sent in a flow test request ticket.
- Given one week's notice to Utilities Dept.
- Talked with a utilities supervisor. (If a supervisor does not communicate with you beforehand it can be assumed that the crew will NOT be dispatched during your requested date) Corey (970)-764-5664 Jason (970)-764-5655
- Location of hydrant sent to Utilities via (<https://co-durango.civicplus.com/390/GIS-Maps>)
- Have made a viable point of contact to all potentially affected customers regarding cloudy or murky water ect. (At least one week in advance, **Dialysis offices**, Dr Office's, Dentist offices, Restaurant's, Food prep, ect.) (Google maps is helpful)
- Know (approximately) where water will go. (Not going to damage property.)
- 2.5" or 4.5" 250psi gate valve (Brass work the best) must have 1 gate valve per hydrant nozzle being flowed. Hose monster diffuser or similar, (May require a hitch mounted diffuser depending on location of flow test.)
- Dechlorination tablets or a way to dechlorinate water coming out of diffuser.
- Get approved traffic control plan and a revocable use of Right-of-way Permit through engineering dept (970)-375-4850
- Contacted DFPD fire Marshall Karola Hanks plenty of time in advanced (970)-382-6023

Scheduled test dates (Tuesdays only 9:00am to 3:00pm)

Scheduled test date: _____

Second test date if first doesn't work out: _____

Disclaimers

- Utilities crew is only responsible to open and close hydrant.
- Utilities crew will not do traffic control, notify customers, set up and break down equipment, read gauges, clean up any debris that may have been washed out due to test.
- **Fire hydrant flow test can be cancelled anytime by the utilities crew/supervisor** due to emergency water/sewer repair, inclement weather, safety concerns, incomplete contractor checklist, contractor is late (more than 15mins) to the appointment.
- Any last min changes on location of flow test will require a new flow test request form to be filled out and won't be preformed.
- The Contractor is responsible for any and all damages or clean-up associated with the flow test. The contractor shall provide the necessary clean-up or repairs at the time of the flow test. Clean up or repairs in the City of Durango's right of way that are not corrected immediately will be corrected by the City of Durango's Utilities crew and charged back to the contractor.
- Water flow test will not be allowed to flow on to major streets without traffic control plans.
- By signing this form you are agreeing to the terms and conditions stated for conducting a fire hydrant flow test with the city of Durango utilities.
